

Frontier Consultancy

AI-First Delivery for Partner Consulting Teams

A partner enablement programme that teaches AI-first delivery by running it on a real internal project of yours, before any customer is on the hook. **Three tracks. One motion.** Same agents, same toolstack, same playbook your team takes to paying engagements the week after.

55%

faster task completion with GitHub Copilot

20–30%

faster delivery on cloud + AI-assisted modernization

30–40%

lower delivery cost vs. traditional motion

THREE TRACKS · PILOT PHASE

● CAIP · Azure

● AIBS · D365 & Power Platform

● Security · in scoping

THE PARTNER CHALLENGE

Delivery is changing faster than practices.

- Expert consultant time consumed by low-value tasks AI can handle today.
- Skill shortage across Azure, D365, and Security delivery practices.
- Customer expectations on cost, speed, and AI-readiness rising quarter on quarter.
- AI-first delivery is becoming the new baseline. Partners who build the muscle now keep margin when it does.
- Training alone does not change practice. Doing the work does.

THE ENGAGEMENT

An AI-first motion you learn by doing.

Frontier Consultancy equips a partner team to deliver AI-first work end to end. The mechanism is **customer-zero**: your team builds the playbook and the toolstack by running a real internal project before any paying customer is on the hook.

Build AND operate. The same agent fleet that builds the platform stays attached to run it. Project revenue on the build, recurring revenue on the operating layer. One toolstack does both.

- Hands-on workshop using your own laptops, tools, and repos.
- Real agents, MCP servers, and Copilot patterns built during the engagement.
- Customer-zero project run by your team, coached by Microsoft.
- Reusable artifacts you keep and redeploy on the next paying engagement.

THE FRONTIER MOTION · FROM WORKSHOP TO AI-FIRST PRACTICE

PHASE 1

Workshop

Hands-on day with the deck, exercises, and live agents.

PHASE 2

Customer-zero

Your team runs a real internal project with our coaching.

PHASE 3

Co-delivery

First customer engagement with Microsoft alongside.

PHASE 4

GTM & reuse

Joint case study, demo asset, marketplace listing if it fits.

PHASE 5

Scale

Partner trains own consultants. Showcase day. Community.

WHAT YOU WALK AWAY WITH

Artifacts, not slides.

- **A working customer-zero project.** Real internal use case shipped before the programme ends.
- **A reusable agent or asset.** Built during customer-zero, deployed to the next engagement.
- **A curated toolstack.** Skills, agents, and MCP servers for Copilot CLI and VS Code.
- **An AI-first delivery playbook.** The framework the workshop teaches, in writing.
- **Hands-on exercise material.** Clones to your machine. Yours to keep and rerun.
- **A team that has done it once.** The hardest part to fake.

WHO SHOULD ATTEND

The team that ships, not just the team that plans.

- Delivery managers and practice leads building an AI-first capability.
- Senior consultants and architects who will adopt the motion on customer engagements.
- Pre-sales engineers preparing demos and proposals.
- Technical leads across Azure, D365 & Power Platform, or Security practices.

AI TOOLS & TECHNOLOGIES

Hands-on across the Microsoft AI stack.

Participants work with the tools they will use on customer engagements. Per-track focus, common foundations.

Copilot CLI

VS Code Agent Mode

GitHub Copilot

Copilot Studio

M365 Copilot

Azure AI Foundry

Dataverse MCP

ADO MCP

Custom MCP servers

Power Platform

Dynamics 365

Sentinel & Defender

BUSINESS OUTCOMES FOR YOUR PRACTICE

Margin, IP, and a stronger Microsoft motion.

- Increase pre-sales and delivery capacity without adding headcount.
- Decrease implementation lead-time and cost for customers.
- Productize assets from customer-zero and resell across engagements.
- Layer a **build-and-operate** revenue stream on top of project work. Agents that built the platform stay on to run it.
- Drive consumption of Copilot, Azure AI, and the Microsoft AI stack.
- Open AI-first revenue streams beyond traditional services hours.
